Design

Functionality

Connectivity

Versatility

eoSmart is highly technified and versatile 24/7 technical console designed and manufactured following the highest ergonomic standards.

The Sit/Stand functionality, adjustable upper structure, resistant worksurface and innovative aesthetics take the 24/7 technical console concept to the next level.

Design

High-end aesthetics, advanced ergonomics, and remarkable robustness introducing a new way of working in the most demanding **24/7 environments**.

Functionality

Designed specifically for mission-critical environments and constructed to withstand the day-to-day operations of shift changes, upset scenarios, and technology requirements.

Connectivity

Wide range of connectivity options with Power, Data and Multimedia modules.

Versatility

Customization options: connectivity, dimensions, shapes, backlit corporate logo, LED lighting...

- CPU storage

Structural CPU storage with high capacity for IT equipment (PCs, KVMs,...). Integrated on the console substructure with easy access for maintenance.

- Drawers cabinet

Built into the structure. Thanks to the IoT option, exclusive access per user to the drawers by QR code and NFC is allowed.

- Ergonomic Monitors mounts

Possibility of configuring monitors in line or double height. Highest flexibility and adjustability. Optimized sightlines.

- Signage (optional)

LED safety signage

- Corporate logo (optional)

Backlit custom logo on side legs.

- Sit / Stand (optional)

Sit / Stand ergonomic option. The electric height adjustable desk can be raised and lowered by the simple touch of a button.

↕ Sit / Stand

● Height control system laser engraved on the phenolic board.

eoSmart console is designed for **24/7** work environments, with adjustable height, to comply with the new standards.

Adjusting the console to suit the end-user allows for personalization of the workspace, and increased comfort, and provides a better fit, reducing CTDs.

By providing the operators with the ability to change their work environment throughout their shift, many difficulties normality associated with inactivity can be avoided.

IOT Option

- Smartphone Personal Security Access.
 - Virtual locks & keys.
 - Securely access IT & operational (OT).
- Smart log in for operators and their environment:
 - Automatic and personalized adjustment of the operating workspace applications.
- 3rd party Systems integrated possibility: FMS, VMS, PMS.
