CPU storage
Detached option

CPU storage
Structural option

Eos Advance CPU/IT compartments can be adapted depending on the equipment to be installed on the operator's positions and the available space on site. In any case, every project is evaluated thoroughly in order to propose the best and more convenient solution for the end user.

Both in the Structural and in the Detached options, the CPU storage cabinets allow for a proper installation of PCs, KVM and any other kind of IT equipment thanks to its suitable heating and wiring management design.
